![New York State | Division of Criminal Justice Services]

Quarterly Activity Report

County Re-entry Task Forces (CRTF)

July – September 2018

Data as of October 2018

Issued April 2019

Table of Contents

Background

The NYS Division of Criminal Justice Services (DCJS) provides important feedback to funded programs through this Quarterly Activity Report. The report presents the number of participants admitted and discharged each quarter, as well as a year-to-date total. The report includes information on participant characteristics, such as sex, age, DOCCS supervision level, and current criminal charges, for County Re-entry Task Forces (CRTFs) funded by DCJS. The report also includes counts of admissions and successful completions of approved CBI and employment readiness programs for each quarter and the year-to-date.

Report Tables

The Quarterly Activity Report presents the tables listed below. A detailed description of each table, including how cases were counted, can be found in Appendix A. A description of the process used to match cases to criminal history information can be found in Appendix B.

- CRTF Intakes, by Program
- CRTF Discharges, by Program
- Characteristics of Program Intakes, by Program
- Characteristics of Program Discharges, by Program

Appendix A. Detailed Description of Tables

<u>CRTF Intakes</u> presents intakes to each of the CRTFs for each quarter of the current contract year and the year-to-date. This table includes all intakes since October 1, 2017. If a participant had more than one intake, all intakes to the program are counted. The intakes are then summed to produce a cumulative number of intakes reported during the contract year.

<u>CRTF Discharges</u> presents discharges from each of the CRTFs for each quarter of the current contract year and the year-to-date. This table includes all discharges since October 1, 2017. If a participant had more than one discharge, all discharges from the program are counted. The discharges are then summed to produce a cumulative number of discharges reported during the contract year.

<u>Characteristics of Program Intakes</u> presents more detailed information on participant characteristics. Characteristics include sex, age at admission, DOCCS supervision level, and characteristics of the placement offense. Violent Felony includes all violent felony offenses (VFOs) and VFO-like offenses (see Penal Law (PL) 70.02); Drug Offense includes all PL 220 and PL 221 offenses that are not otherwise VFOs; Property includes non-VFO property offenses (e.g., petit larceny); and Other Offenses includes all other PL and VTL offenses not otherwise categorized. The numbers of admissions to approved CBI and employment readiness programs during each quarter of the contract year are also presented. Participants with missing or invalid NYSIDs are not included in the table. Counts, percentages, and program totals are presented for each quarter of the current contract year and cumulative year-to-date.

<u>Characteristics of Program Discharges</u> presents detailed information about participants discharged during each quarter. The table presents the count and percentage of participants who successfully completed the CRTF program, as well as the average length of stay (LOS) in the CRTF for successful completions (reported in days). This table also includes the percentage of participants rearrested while participating in the program. Percents are based on official criminal history information. Percents are provided for participants with any in-program rearrest, and participants with a rearrest for a felony level offense. The average number of days from intake to the first in-program arrest and first in-program felony arrest are also presented. The table also includes the number of participants completing approved CBI and employment readiness programs during each quarter of the contract year and cumulative year-to-date.

Appendix B. Matching Admissions to CCH

The Computerized Criminal History (CCH) database includes all fingerprintable arrests reported to DCJS, as well as information about case dispositions. CCH data provide a complete history of an arrestee's known criminal activity.[1] OJRP developed the following rules to match intakes to CCH data. After extensive analyses, these rules were determined to provide the best matches to arrests in CCH for the programs funded by DCJS.

Matching Rules:

1. Files were first matched on NYSID and DIN, as provided by the programs.
2. If there was not an exact match on NYSID and DIN, cases were matched to the last DOCCS release before program admission.
3. If the admission could not be matched on NYSID or DOCCS release date, the admission was excluded from further analysis.

The detailed intake tables included in this report present information on only those intakes that were matched to CCH (96% of reported cases). Of the 196 cases not matched to CCH, 13 had invalid NYSIDs, 111 had missing NYSIDs, and 72 did not have an eligible DOCCS release, based on the rules outlined above. Please note that cases not matched to CCH may include juveniles released from OCFS to Parole.

The matching results are summarized below.

Matching CRTF Intakes to CCH

Matching Process	Number	Percent
Total Number of Reported Cases	5,257	100%
Match by NYSID and DIN	4,666	89%
Match by NYSID and last DOCCS Release before Intake	395	7%
Total Matched to CCH	5,061	96%
Total Not Matched to CCH	196	4%

---

[1] Arrests in CCH are organized by NYSID, which is assigned when an arrestee is fingerprinted. If the case is disposed in favor of the defendant, and the defendant has no prior convictions, the fingerprints are destroyed and the NYSID is no longer assigned to that defendant. If the defendant is re-arrested, a new NYSID is assigned. Because CCH is organized by NYSID, the initial arrest, stored under a different NYSID, is not included in the defendant's arrest history, and would not be reflected in the Participant Characteristics table.
