

Probationer Felony Re-Arrest Rates Following Sentence

Division of Criminal Justice Services
Crimestat Report

Date Prepared: November 22, 2010

**Report Methodology
for
Probationer Felony Re-Arrest Rates Following Sentence**

Includes offenders convicted of felony and misdemeanor offenses who were sentenced to probation by a New York State court during the time period indicated. Interim supervision cases are excluded. Calendar year cohorts are followed for one, two and three year time periods. If a probationer has multiple arrests across arrest categories, they will be counted in more than one category (VFO, Drug, and Other). For example, if a probationer has both a VFO arrest and a drug arrest during the follow-up period, they will be counted in both the VFO and Drug categories. However, the **Total Percent Arrested** category **includes only one arrest per offender**.

Number Sentenced – Number of felony and misdemeanor offenders sentenced to probation during the reporting period.

Percent Arrested for VFO - Percent of probationers sentenced who were arrested for one or more violent felony offenses within the reporting period.

Percent Arrested for Drug Offense - Percent of probationers sentenced who were arrested for one or more felony drug offenses within the reporting period.

Percent Arrested for Other Offense - Percent of probationers sentenced who were arrested for one or more other felony offenses within the reporting period.

Total Percent Arrested – Percent of probationers who were arrested for *any* felony offense within the reporting period. **Only one arrest per offender is included in this percentage.** The percentages reported within each follow-up period for VFO, Drug and Other Arrests do not add up to the Total Percent Arrested because probationers with arrests in more than one category are counted only once in the total.

Any comparisons between probationer felony arrest rates among county probation departments should be done with caution. Arrest practices, sentencing practices, and the overall risk of the probation population can vary dramatically from county to county.
