

Division of Criminal Justice Services

Crime in New York State

2007 Final Data

This report and the attached appendices provide the most recent information available on the number of Index crimes and rates per 100,000 population for each county in New York State. County population data are provided every year by the FBI based on US Census estimates and are used to calculate crime rates. Crime counts are based on official crime reports submitted to DCJS through the Uniform Crime Reporting (UCR) and Incident Based Reporting (IBR) programs. Index offenses include the *violent* crimes of murder, forcible rape, robbery and aggravated assault; and the *property* crimes of burglary, larceny, and motor vehicle theft. The crime rates show the number of incidents reported per 100,000 residents.

The summary includes information on crimes reported in New York State for the last 10 years. These figures include all reports received by DCJS as of September 9, 2008. These figures differ slightly from those published by the FBI. The FBI reports include estimations for agencies with incomplete reporting, and exclude data submitted after FBI deadlines.

Detailed information on crime data for each reporting agency from 2003 through 2007 is available on the DCJS website: <http://criminaljustice.state.ny.us/crimnet/ojsa/indexcrimes/counties.htm>

Commissioner, DCJS

Issued: September 15, 2008

Crime in New York State

Over the past 10 years, the crime rate in New York State has declined steadily. The largest reductions in crime rate were reported for motor vehicle theft, burglary, and robbery. Overall, the rate of index crimes per 100,000 resident population has declined 33% since 1998; the rate of violent crimes (murder, rape, robbery, and aggravated assault) fell 35% and property crimes (burglary, larceny, and motor vehicle theft) were down 33%. Appendix 1, which is attached, provides both crime counts and rates for each year.

While New York State's crime rate has decreased greatly over the past 10 years, New York has also reported a significant reduction in the actual number of crimes reported. Since 1998, the number of major crimes reported has fallen every year to the lowest levels recorded since statewide reporting began nearly 40 years ago. In 2007, there were 188,870 fewer crimes reported than in 1998, while the population of the State has increased by over one million since 1998.

Crime in New York State

Regional Crime as a Percent of Statewide Crime

Not all areas of the State have benefited equally from the historic reduction in crime. The decline in Index crime in New York City was much larger than that experienced in counties outside of New York City. Appendix 2, which is attached, provides detail by region.

Given the greater decline in crime in New York City, the proportion of statewide crime that

each region accounted for has shifted dramatically. The counties outside New York City now account for 56% of the reported crime statewide, as compared to 37% in 1990.

While a higher proportion of the State's violent crimes occurred in New York City, that region reported a 41% drop in violent crimes since 1998, while the Non-New York City counties reported a decline of 2%. All violent crime categories declined in New York City between 1998 and 2007 while the Non-New York City region reported increases in both murders and rapes over the last 10 years. The detail is provided in Appendix 2.

Regional Trends in Violent Crime

Crime in New York State

Recent Statewide Crime Trends: 2006 vs. 2007

The most recent 2007 crime data show that crime volume in New York State declined for the 17th consecutive year.

**Percentage Change in Crime Volume
2006 vs. 2007**

In 2007, New York State reported an overall drop of 4% in the seven major Index crimes as compared to 2006.

Violent crimes dropped by 5% and the largest decline among offenses was reported in murders (-13%).

Property crimes were down 3% driven by a 13% drop in motor vehicle thefts.

The Non-New York City region reported larger declines in index, violent and property crimes between 2006 and 2007 than the New York City region. This marks the first time since 1993 that the annual crime decline outside of New York City exceeded the decrease reported within New York City. Crime counts for 2006 and 2007 are presented for each county in Appendix 3, and county crime rates for 2007 are provided in Appendix 4.

Percentage Change in Crime Volume by Region: 2006 vs. 2007

New York City

Non-New York City

Crime in New York State

The Uniform Crime Reporting system includes information provided by law enforcement regarding the number of violent crimes reported which involved the use of a firearm. Currently, these figures are only available from the Non-New York City region. There were 5,250 reported violent crime incidents which involved a firearm during 2007, a decrease of 15% over 2006, but an increase of 23% over 1998. Appendix 5 provides counts of firearm related crimes for each of the violent Index crimes.

Violent Crimes by Firearm: Non-New York City

Appendix 5 shows that during 2007, 174 of 307 murders reported outside of New York City involved a firearm (57%). The number of robberies which involved a firearm decreased by 21%, from 3,412 in 2006 to 2,712 in 2007. There were 2,333 aggravated assaults which involved a firearm reported in 2007, a decrease of 8% over the 2,530 reported in 2006.
